ONEFOUNDR — PILLAR 1: THE SPARK

Full Revised Structure

PILLAR OVERVIEW

```text

Name: The Spark
URL: /spark
Core promise: Find your idea, validate it fast,
and take your first real step —
without quitting your job or losing your mind.

Audience: Anyone at the very beginning.
No idea yet. One idea. Too many ideas.
Scared to start. Ready to start but unsure how.
Doing this alongside a job.
Forced into this by circumstance.

The honest version of starting —
for real people in real circumstances.
```

PILLAR REALITY FRAMING

Use these on the pillar hub page

```text
The starting reality:
- 59% start this alongside a job
  (you don't have to quit to begin)
- 42% fail because nobody wanted
  what they built
  (validation is everything)
- Nearly half start with less than $5,000
  (you don't need much money to start)
- 20.4% fail in the first year
  (but not for the reasons you think)
- 84% self-funded through savings
  (nobody is writing you a cheque)

The emotional reality:
- Most people wait for permission
  that never comes
- Most people think everyone else
  is more ready than they are
- Most people have the right idea
  but the wrong timing on execution
- Starting scared is normal

  Starting perfect is a myth
```

GATEWAY HUB: THE HONEST START ← MOAT 1

```text
URL: /spark/the-honest-start

This is the moat piece.
The content nobody else will write.

Purpose: Name the real experience of starting
honestly — before any tactics.
Make the reader feel seen before
giving them a single thing to do.

This is what gets shared.
This is what builds the list.
This is what differentiates Pillar 1
from every competitor.
```

Hook:

```text
"Everyone talks about how exciting it is
to start a business.

Nobody talks about the 2am doubt.
The idea you can't tell if is brilliant
or delusional.
The waiting for permission
that never comes.
The watching others seemingly
know exactly what they're doing
while you're still not sure
you're allowed to try.

This is the honest version.

The one that actually helps."
```

Content to cover:

```text
THE FIVE REAL EXPERIENCES OF STARTING:

EXPERIENCE 1: The 2am Doubt
"What if I'm not good enough for this?"

Not imposter syndrome — that's different.
This is the specific doubt of someone
who hasn't started yet.

The gap between who you are now
and who you think a founder should be.

What it actually sounds like:
"I'm not a business person."
"I don't have the right background."
"People like me don't do this."

The truth:
There is no founder type.
The research on who actually starts
solo businesses destroys the myth.
Average age 35. 50% women.
56% triggered by economic pressure.
Most started scared.

EXPERIENCE 2: The Idea Paralysis
"I don't know if my idea is good enough
to be worth starting."
```

The gap between having an idea and
believing in it enough to act.

What it actually sounds like:
"Someone has probably already done this."
"What if nobody wants it?"
"I need to do more research first."

The truth:
You cannot think your way to certainty.
Certainty comes from testing — not thinking.
The research says 80% of ideas that
sound good fail in market.
Which means the only way to know
is to find out.

EXPERIENCE 3: The Permission Problem
"I'm waiting for someone to tell me
I'm allowed to do this."

Nobody gives you permission.
This is the thing nobody says out loud.

What it actually sounds like:
"I'll start when I have more experience."
"I'll start when I have more money."
"I'll start when the time is right."

The truth:
The time will never be right.
The experience will never feel like enough.
The money will never feel sufficient.
Permission is something you give yourself.
Here's how.

EXPERIENCE 4: The Comparison Trap
"Everyone else seems so far ahead."

Specific to the starting phase —
looking at established solopreneurs
and feeling like the gap is uncrossable.

What it actually sounds like:
"They've been doing this for years."
"They have an audience already."
"They make it look easy."

The truth:
You're comparing your beginning
to someone else's middle.
Every person you admire started
with zero clients, zero audience,
zero certainty.
The gap is an illusion of timing —
not ability.

EXPERIENCE 5: The Safety Calculation

```
"What if I start and it doesn't work?
What do I lose?"

The specific fear of someone who has
something to lose.
A job. A reputation. A sense of identity.

What it actually sounds like:
"I can't afford to fail."
"What will people think?"
"What if I give this everything
and it doesn't work?"

The truth:
This fear is rational — not weakness.
It deserves a real answer — not
toxic positivity.
Here's the honest risk calculation
for starting a solo business in 2024.
```

The Assessment — Lead Magnet:

text

```
THE HONEST START ASSESSMENT ← EMAIL GATED

"Which of these five experiences
is holding you back?
And what specifically to do about it."

5-question assessment.
Personalized output.
Email gated.

This is the primary email capture
for Pillar 1.

Why it converts:
People who read The Honest Start hub
feel seen. The assessment gives them
something specific to do with that feeling.
The output tells them exactly where
they are and what their next step is.

Output format:
Your Primary Blocker +
Your Specific Next Step +
The content on OneFoundr most
relevant to your situation
```

LAYER 1: THE FOUNDATION HUBS

Before tactics. The reframes that make everything else work.

FOUNDATION HUB 1: THE SIDE HUSTLE TRUTH ← MOAT 2

text

```
URL: /spark/side-hustle-truth

This is the second moat piece.
59% of solopreneurs are doing this
alongside a job.
That's the majority.
And they're completely underserved.

Purpose: Give the side hustle path
full legitimacy and a complete framework.
Not a stepping stone.
The smart path for most people.
```

Hook:

text

```
"Every piece of business advice
assumes you're going all-in.

Quit your job. Burn the boats.
Go all in or go home.

59% of solopreneurs haven't quit their job.
They're building alongside it.

That's not a lesser version
of the journey.

For most people — it's the smarter one."
```

Content to cover:

text

```
Why the side hustle path is legitimate:
The data on solopreneurs who start part-time
```

```
vs those who go all-in immediately.
The risk reduction of keeping income
while testing.
The side hustle to full-time journey —
the most common path nobody talks about.

The side hustle reality:
What you can realistically build
in 5-10 hours per week.
What takes longer than people think.
What's faster than people expect.

The three side hustle mistakes:
Mistake 1: Treating it like a hobby
(no structure, no targets, no timeline)
Mistake 2: Trying to hide it from employer
(what you actually need to check)
Mistake 3: Waiting until it's "ready"
before telling anyone
(the longest wait with no end point)

The side hustle legal checklist:
What your employment contract actually says
What you need to check
What you need to declare
When to register as self-employed
What side income means for your taxes

The side hustle to full-time threshold:
Not "when it feels right."
The specific financial calculation.
Your survival number.
Your replacement number.
Your quit number.
When those three align — then you quit.

The side hustle timeline — honest version:
Month 1-3: Finding and validating
Month 4-6: First clients or sales
Month 7-12: Building consistency
Month 12-24: Evaluating the full-time decision
This is the real timeline.
Not overnight. Not years.
12-24 months of consistent part-time work.

Cross-link: Hub 5 Startup Costs

Cross-link: Hub 6 Legal Setup
```

FOUNDATION HUB 2: THE FOUR STARTING POINTS

```
text
```

```
URL: /spark/starting-points

Purpose: Name the four different places
people start from — and route them
to the right content for their situation.

This replaces the need for a quiz mechanic.
The reader self-identifies and routes themselves.
```

Hook:

text

```
"Not everyone starts from the same place.
Where you start changes everything —
what you should do first,
what you should avoid,

and how long this will realistically take."
```

Content to cover:

text

```
THE FOUR STARTING POINTS:

TYPE 1: THE BLANK SLATE
"I want to work for myself but I
don't know what business to start."

What this looks like:
You know you want independence.
You don't know what you'd sell.
You're looking for an idea that fits you.

What you need first:
Not a list of business ideas.
A framework for finding YOUR idea.
One that connects your skills,
your experience, and what people
will actually pay for.

Your next step:
→ Hub 1: Finding Your Idea

TYPE 2: THE SINGLE IDEA
"I have one idea and I want to
know if it's actually viable."

What this looks like:
You have a specific idea.
You're not sure if it's a real business
```

```
or wishful thinking.
You want to know before you invest
more time or money.

What you need first:
Not more research.
A validation system that tells you
definitively whether to pursue it.

Your next step:
→ Hub 2: The Validation Sprint

TYPE 3: THE MULTIPLE IDEAS
"I have too many ideas and I
can't decide which to pursue."

What this looks like:
You have three, five, maybe ten ideas.
Every time you get excited about one,
another one pulls you back.
You're paralysed by the options.

What you need first:
Not another idea.
A decision framework that kills
the wrong options and surfaces the right one.

Your next step:
→ Hub 1: Finding Your Idea
(The Idea Filter section)

TYPE 4: THE RELUCTANT STARTER
"I have an idea and I know what to do.
I'm just scared to actually start."

What this looks like:
Tactically you know what to do.
Emotionally you're not moving.
The fear is louder than the plan.

What you need first:
Not more tactics.
An honest conversation about
what's actually stopping you.

Your next step:
→ Gateway Hub: The Honest Start

Routing logic:
Each type has a clear next step.
The reader self-selects.
No quiz needed.
No complex mechanic.

Just honest naming of where they are.
```

LAYER 2: THE SYSTEM HUBS

The tactical journey — sequenced correctly.

HUB 1: FINDING YOUR IDEA

text

```
URL: /spark/finding-your-idea

Replaces the current Business Ideas hub.
Not a directory of 41 ideas.
A framework for finding YOUR idea.
The directory supports the framework —
not the other way around.
```

Hook:

text

```
"The business idea you're looking for
probably already exists in your life.
In your skills. Your frustrations.
Your experience.
The problem isn't finding an idea.

It's recognising the one you already have."
```

Content to cover:

text

```
The Idea Trap:
Why browsing lists of business ideas
almost never works.
The passion trap — named and explained.
The copycat trap — named and explained.
The over-complication trap —
named and explained.

The three idea sources:
SOURCE 1: Your Skills
What can you do that others find difficult?
Not just professional skills —
life skills, hard-won experience,
```

things you learned by necessity.
The Skills Audit framework.

SOURCE 2: Your Frustrations
What problems have you personally experienced
that nobody solved well?
The Frustration-to-Idea framework.
"I had this problem. Nobody solved it.
I solved it myself. Now I can sell that."

SOURCE 3: Your Observations
What do you see people struggling with
repeatedly that you could solve?
The Observation framework.
What complaints do you hear constantly?
What do people pay for that you
could deliver better?

The Idea Filter:
For people with too many ideas —
a decision framework not a list.
Five questions that kill the wrong ideas:

Question 1: Would someone pay for this
without me having to convince them?
(Desperation test — need vs desperate need)

Question 2: Can I deliver this as one person
sustainably?
(Solo viability test)

Question 3: Do I have an unfair advantage here
over someone starting from scratch?
(Advantage test)

Question 4: Can I validate this in 7 days
without building anything?
(Validation speed test)

Question 5: Is this a real market or
am I the only person with this problem?
(Market existence test)

Run every idea through these five.
The one that passes all five —
that's the idea to pursue.

The Business Ideas Directory:
The 41 ideas still exist —
but they serve the framework now.
Filterable by:
- Starting point (Blank Slate, Single Idea, etc)
- Business type
- Side hustle viability
- Startup cost
- Time to first revenue

Cross-link: Hub 2 Validation Sprint

```
Cross-link: Foundation Hub 1 Side Hustle Truth
```

HUB 2: THE SOLO VALIDATION SPRINT ← MOAT 3

```text

URL: /spark/validation-sprint

FLAGSHIP HUB. The primary tactical moat.
The most important hub in Pillar 1.

Why:
42% of solo businesses fail because
nobody wanted what they built.
This hub exists to prevent that.

What makes it a moat:
Every competitor's validation advice
assumes you're building a SaaS.
Landing pages. Email capture. DMs.

This is the only complete validation
system built for ALL solopreneur
business types.
```

Hook:

```text

"42% of businesses fail because
nobody wanted what they built.

That's not bad luck.
That's skipping validation.

This is the only validation system
built for every type of solo business —

not just tech startups."
```

Content to cover:

```text

Why Most People Validate Wrong:

The Mom Test Problem:
Asking friends and family
```

who tell you what you want to hear.
Why their feedback is worthless.
What to do instead.

The Survey Problem:
Online surveys with no skin in the game.
Why responses mean nothing.
What actual validation looks like.

The Research Problem:
Spending weeks on market research
before talking to a single potential customer.
Why this is procrastination dressed as work.

The Build-First Problem:
Creating the product before verifying demand.
The most expensive mistake in starting a business.

What Real Validation Is:
Not: "Do you think this is a good idea?"
Not: "Would you buy this?"
Yes: "Here is the thing. Will you buy it now?"

Only money committed is real validation.
Everything else is opinion.

THE 7-DAY SOLO VALIDATION SPRINT:

Day 1: Define your riskiest assumption
What is the one thing that must be true
for this business to work?
If this assumption is wrong —
the whole idea fails.
That's what you're testing.

Day 2: Find your target customer
Not demographics. Specific people.
Where are they? What are they saying?
What language do they use about the problem?

Day 3: Talk to three people
Not to pitch. To understand.
The Customer Conversation framework.
What to ask. What not to ask.
How to listen for what they don't say.

Day 4: Build your minimum offer
Not a product. Not a website.
A clear description of what you'd sell
and what it costs.
One paragraph. One price.

Day 5: Try to sell it
The pre-sell conversation —
word for word.
How to ask for money before
you've built anything.

Day 6: Analyse the signal
What did people say?
What did people do?
The difference between interest and intent.

Day 7: Go / Refine / Kill
The decision framework.
What the data is telling you.
What to do with it.

VALIDATION BY BUSINESS TYPE:

[SERVICE BUSINESSES]
Validation approach:
Outreach to potential clients directly.
The service pre-sell script.
"I'm launching X for Y people.
First 3 clients at Z price.
Interested?"
Pass threshold: 3 paid deposits

[LOCAL/PHYSICAL BUSINESSES]
Validation approach:
Door knocking. Facebook local groups.
Pop-up trials. Discounted first run.
Talking to local businesses.
The local validation script.
Pass threshold: 5 committed customers
in your target area

[DIGITAL PRODUCTS]
Validation approach:
Landing page with email capture.
Pre-order page with payment.
The 48-hour DM sprint.
Pass threshold: 20 pre-orders OR
100 email signups in 7 days

[PROFESSIONAL SERVICES]
Validation approach:
Existing network outreach.
LinkedIn positioning test.
The consulting pre-sell approach.
Pass threshold: 2 paid discovery calls

THE VALIDATION SCORECARD ← LEAD MAGNET

A scored assessment of idea viability.
12 questions across 4 dimensions:

Dimension 1: Problem Reality
(Is this a real painful problem?)

Dimension 2: Market Existence
(Are there enough people with this problem?)

Dimension 3: Willingness to Pay
(Will they actually pay to solve it?)

```
Dimension 4: Your Advantage
(Why you specifically?)

Score output:
80-100: Strong validation signal — proceed
60-79: Partial validation — refine then test
40-59: Weak signal — significant pivot needed
Below 40: Kill this idea — start again

Email gated. High utility. High conversion.

The Go / Refine / Kill Decision:
What each outcome actually means.
What to do with each result.
How to pivot without starting from scratch.
How to kill an idea without losing momentum.

Cross-link: Foundation Hub 2 Four Starting Points

Cross-link: Hub 3 Business Models
```

HUB 3: BUSINESS MODELS

text

```
URL: /spark/business-models

Restructured to connect to starting points
and validation — not exist in isolation.

Key change from current structure:
Business Models now comes AFTER
initial validation signal —
not before.

You validate the problem first.
Then you choose the model.
```

Hook:

text

```
"Your idea is validated.
Now the question is:
what structure should this business take?

The model you choose determines
how much you work, how much you earn,
and how quickly you can scale.
```

```
Most people choose by default.

Here's how to choose deliberately."
```

Content to cover:

```text
The 8 Models — kept but reframed:
Each model now includes:
- Startup cost (critical for the 84% self-funding)
- Side hustle viability score
- Time to first revenue
- Solo scalability rating
- Best fit starting point

THE 8 MODELS:

1. Freelancing
Startup cost: Near zero
Side hustle viability: High
Time to first revenue: 1-4 weeks
Solo scalability: Medium
Best for: Blank Slate, skills-based

2. Consulting
Startup cost: Near zero
Side hustle viability: Medium
Time to first revenue: 2-8 weeks
Solo scalability: Medium-High
Best for: Single Idea, expertise-based

3. Productized Services
Startup cost: Low
Side hustle viability: High
Time to first revenue: 2-6 weeks
Solo scalability: High
Best for: Any type — ideal end state

4. Digital Products
Startup cost: Low-Medium
Side hustle viability: Very High
Time to first revenue: 4-12 weeks
Solo scalability: Very High
Best for: Multiple Ideas, knowledge-based

5. SaaS/Software
Startup cost: High
Side hustle viability: Low
Time to first revenue: 3-12 months
Solo scalability: Very High
Best for: Technical founders only

6. Content and Media
```

```
Startup cost: Near zero
Side hustle viability: Very High
Time to first revenue: 6-18 months
Solo scalability: High
Best for: Long game builders

7. Coaching and Teaching
Startup cost: Near zero
Side hustle viability: High
Time to first revenue: 2-6 weeks
Solo scalability: Medium
Best for: Expertise and transformation

8. Agency of One
Startup cost: Low
Side hustle viability: Medium
Time to first revenue: 2-8 weeks
Solo scalability: High
Best for: Service + leverage mindset

The Model Decision Framework:
Not a comparison table alone —
a decision tree.
Based on:
Starting point (which of the four types)
Available time (side hustle vs full-time)
Available capital
Risk tolerance
Target income timeline

The Side Hustle Model Filter:
Which models work alongside employment?
Ranked by side hustle viability.
With honest time requirements for each.

Cross-link: Hub 4 Niche Selection
Cross-link: Hub 5 Startup Costs

Cross-link: Pillar 2 The Offer
```

HUB 4: NICHE SELECTION

```
text

URL: /spark/niche-selection

Kept but significantly strengthened.
The contrarian anti-niche framing is right.
The gaps filled:
- Passion Trap applied to niche
- Niche validation connection
- Desperation Test applied to niche
- The niche evolution path
```

Hook:

```text
"The biggest lie in business advice:
find your passion and the money will follow.

The truth:
Find a desperate problem in a reachable market
and the passion often follows the success.

Niche selection is not about what you love.

It's about where you can win."
```

Content to cover:

```text
The Anti-Niche Myth Debunked:
Why "don't niche too early" is wrong advice.
The data on specialist vs generalist earnings.
When broad makes sense vs when narrow wins.

The Passion Trap Applied to Niche:
Choosing a niche because you love it
vs choosing because people are
desperate enough to pay for it.
The difference. Why it matters.
Real examples of passion niches that fail.

The Niche Formula:
Skill + Audience + Pain = Niche
(kept from current structure — it's right)

The Desperation Test Applied to Niche:
Not: "Who needs this?"
But: "Who is desperate enough to pay
without needing to be convinced?"

Need ≠ Desperation.
Everyone needs better sleep.
Very few are desperate enough to pay.
The best niches serve desperate people.

The Three Phases:
Phase 1: Start Broad
(collect data from early clients)
Phase 2: Notice Patterns
(who are your best clients? what do
they have in common?)
Phase 3: Narrow Deliberately
(based on data — not preference)
```

```
The Niche Matrix (2x2):
Kept from current structure.
Axes: Problem urgency vs Market size
Best quadrant: High urgency, focused market

The Niche Validation Connection:
You can't validate without a niche.
You can't niche without some validation.
Here's how to do both simultaneously.
The 48-hour niche test.

The 5 Question Stress Test:
Kept — it's solid.

12 Real Niche Examples:
Expanded to include:
Service businesses
Local businesses
Professional services
Digital products
Content creators
Coaches

The Niche Evolution Path:
Where you start vs where you end up.
Why your first niche is rarely your final niche.
How to evolve without starting over.

Cross-link: Hub 2 Validation Sprint
Cross-link: Hub 3 Business Models
Cross-link: Pillar 2 Positioning
```

HUB 5: STARTUP COSTS

```text
URL: /spark/startup-costs

Strengthened with:
- The Perfect Trap warning
- Cash flow runway calculation
- Side hustle cost structure
- Personal savings conversation
```

Hook:

```text
```

"Nearly half of all solopreneurs start
with less than $5,000.

The best ones spend almost none of it
before they make their first sale.

Here's what actually needs money —

and what definitely doesn't."

Content to cover:

text

The Perfect Trap — Named:
Spending money before you've validated.
Website before clients.
Logo before sales.
Tools before revenue.
The sequence that guarantees failure.

The Right Sequence:
Step 1: Validate (cost: near zero)
Step 2: Make first sale (cost: near zero)
Step 3: Then invest in tools and setup
Not the other way around.

The Teardown:
SPEND THIS:
Domain name (£10/year)
Basic hosting (£10/month)
One core tool for your business type
Professional email address

MAYBE SPEND THIS:
Simple website (after first sale)
Accounting software (after first revenue)
Design tools (if design is your product)

DON'T SPEND THIS:
Logo design (before validation)
Professional website (before clients)
Office space (before you need it)
Courses about business (before doing business)
Expensive tools (before you need them)

Cost breakdown by business type:
8 cards — kept from current structure
Updated with side hustle cost structure.

The Upgrade Path:
£0: Validate the idea
£500: First professional setup
£1,000: Core tools and systems
£3,000: Ready to scale

```
£5,000: Growth investment

Personal Runway Calculation:
The honest conversation about savings.
Before you quit your job:
Your survival number
(minimum monthly personal expenses)
Your business runway
(months you can operate without revenue)
Your quit threshold
(when business income + savings = safe)

68% have less than 6 months savings.
48% experienced a month without income.
29% failed because they ran out of cash.

The side hustle cost advantage:
Why starting alongside employment
is the financially smarter move
for most people.

Cross-link: Foundation Hub 1 Side Hustle Truth
Cross-link: Hub 6 Legal Setup

Cross-link: Pillar 4 Shield
```

HUB 6: LEGAL AND FINANCIAL SETUP

```text

URL: /spark/legal-setup

Built from scratch.
Global framing — not UK-only.
Minimum viable setup approach.
Side hustle legal nuance.
```

Hook:

```text

"Most people spend weeks on legal setup
before they've made a single sale.

Here's the minimum you actually need —

and when you actually need it."
```

Content to cover:

```text

The Perfect Trap Applied to Setup:
Weeks researching LLC vs sole trader.
Before making a single sale.
This is procrastination with paperwork.

The Minimum Viable Legal Setup:
Step 1: Separate bank account (30 minutes)
Step 2: Track income and expenses from day one
Step 3: Register when legally required
(not before — not after)
That's it for your first £/$/€5,000.

Everything else can wait until
you've validated and made first sales.

The Global Framework:
Universal principles first:
- Separate business and personal finances
- Register when your jurisdiction requires
- Understand your tax obligations
- Get a basic contract before any client work

Then jurisdiction-specific guidance:
UK: Sole trader vs Ltd, HMRC,
self-assessment, NI contributions
US: Sole proprietor vs LLC, IRS,
quarterly taxes, state requirements
EU: Varies by country — key principles
Australia: Sole trader, ABN, GST threshold
Global/Other: Universal principles apply

Side Hustle Legal Nuance:
The questions 59% of starters never ask:
What does my employment contract say?
Do I have a non-compete clause?
Who owns IP I create outside work?
Do I need to tell my employer?
What are the tax implications of
side income alongside salary?
When do I officially register?

Basic Contracts:
Why you need one before any client work.
What a solo business contract must cover.
Where to get one without a lawyer.
The three clauses that protect you most.

Insurance:
When you need it.
What type for your business.
How much it actually costs.
What happens if you don't have it.

Cross-link: Hub 5 Startup Costs
```

```
Cross-link: Pillar 4 Shield
```

HUB 7: YOUR FIRST 90 DAYS

```text
URL: /spark/first-90-days

Built from scratch.
Emotional arc alongside tactical plan.
The Boring Middle acknowledged.
Zero marketing budget approach.
Side hustle first 90 days included.
```

Hook:

```text
"The first 90 days are where most
solo businesses die.

Not because of bad ideas.
Because of what happens emotionally
when the excitement wears off
and the results aren't there yet.

Here's what to actually do —

and what to expect when you do it."
```

Content to cover:

```text
The Emotional Arc — Named First:

Days 1-30: The Exciting Start
High energy. High hope.
Everything feels possible.
This is the easy part.

Days 31-60: The First Dip
The excitement wears off.
Results aren't visible yet.
The voice that says "maybe this isn't working."
This is where most people quit.
This is normal. This is the process.
```

Days 61-90: The Commitment Decision
You have enough data now.
Is this working? Is this the right thing?
How do you know?
The decision framework for day 90.

Naming these phases upfront changes
how people experience them.
When the dip arrives — they expected it.
They don't quit.

THE TACTICAL PLAN:

DAYS 1-30: FIND YOUR FIRST CLIENT
Goal: One paying customer.
Not ten. Not a business. One.

Week 1: Warm network outreach
People who already know you.
The outreach script — word for word.
What to say. What not to say.

Week 2: Expand to second degree
Ask your network who they know.
The referral request — word for word.

Week 3: Start visible
Write one thing about what you do.
Post it where your clients are.
Not to build an audience —
to start being findable.

Week 4: Follow up and close
The people who responded but didn't commit.
The follow-up script.
How to close without being salesy.

The £0 Marketing Budget Approach:
You don't need marketing spend
to get your first client.
You need conversations.
Here's how to have them.

DAYS 31-60: DELIVER AND LEARN
Goal: Deliver so well your first client
becomes your best marketing.

The delivery standard that generates referrals.
What to document as you deliver.
How to get a testimonial that actually works.
The referral ask — when and how.

The mid-point assessment:
What's working?
What isn't?
What do you know now that you didn't at day one?

DAYS 61-90: BUILD THE FOUNDATION

```
Goal: Consistency over excitement.

The weekly rhythm:
One day of marketing activity.
Four days of client work.
One day of admin and planning.

The boring middle preparation:
Month 4-6 will be harder than month 1-3.
Here's why — and how to prepare now.

The 90-day review:
7 questions to assess where you are.
What the answers tell you.
What to do next based on what you find.

SIDE HUSTLE FIRST 90 DAYS:
The same arc — different timeline.
When you have 10 hours per week
instead of 40.
What's realistic in 90 days part-time.
How to maintain momentum alongside employment.

MOAT SUMMARY

```
text

MOAT 1: The Honest Start Hub
Location: Gateway Hub
Type: Content moat
Lead magnet: The Honest Start Assessment
— email gated
Hook: The only honest account of what
starting actually feels like — for real
people in real circumstances.
Zero competition. Maximum shareability.

MOAT 2: The Side Hustle Truth Hub
Location: Foundation Layer Hub 1
Type: Content moat
Hook: The only content that treats
the side hustle path as legitimate —
not as a lesser version of the journey.
Serves the 59% majority nobody else serves.

MOAT 3: The Solo Validation Sprint
```

```
Location: System Layer Hub 2
Type: System + Tool moat
Lead magnet: The Validation Scorecard
— email gated
Hook: The only complete validation system
built for ALL solopreneur business types —
not just SaaS and tech startups.
Directly addresses the #1 failure cause.
```

FILE STRUCTURE TO BUILD

```text
src/app/spark/
├── page.tsx (pillar hub page)
├── the-honest-start/page.tsx
├── side-hustle-truth/page.tsx
├── starting-points/page.tsx
├── finding-your-idea/page.tsx
├── validation-sprint/page.tsx
├── business-models/page.tsx
├── niche-selection/page.tsx
├── startup-costs/page.tsx
├── legal-setup/page.tsx
└── first-90-days/page.tsx
```

DATA FILE TO CREATE

```text
src/data/spark.ts

Contains:
Pillar metadata
Gateway hub data (The Honest Start)
Foundation layer hubs (2 hubs)
System layer hubs (7 hubs)
Moat flags for:
- The Honest Start
- The Side Hustle Truth
- The Solo Validation Sprint
Lead magnet data for all three moats
Business type tags for each hub
Side hustle viability scores
```

CROSS-PILLAR LINKS

```text
Pillar 1 → Pillar 2:
Hub 3 (Business Models) ⟷
Pillar 2 Philosophy (Offer Mindset)
(what model vs how to package it)

Hub 4 (Niche Selection) ⟷
Pillar 2 Positioning
(niche vs positioning — related but distinct)

Hub 2 (Validation Sprint) ⟷
Pillar 2 Pre-Selling
(idea validation vs offer validation)

Pillar 1 → Pillar 3:
Hub 7 (First 90 Days) ⟷
Pillar 3 Engine
(first clients vs ongoing client flow)

Pillar 1 → Pillar 4:
Hub 5 (Startup Costs) ⟷
Pillar 4 Shield
(starting costs vs ongoing protection)

Hub 6 (Legal Setup) ⟷
Pillar 4 Shield
(minimum setup vs full protection)

Pillar 1 → Pillar 6:
Gateway Hub (Honest Start) ⟷
Pillar 6 Foundation
(starting fear vs sustaining mindset)

Hub 7 (First 90 Days) ⟷
Pillar 6 The Stage You're In
(launch phase named and acknowledged)
```

DESIGN RULES

```text
Tailwind CSS only — no inline styles
Match existing component patterns
```

```
Cards: bg-white rounded-xl border
border-gray-100 p-6 hover:shadow-md transition
Use CategoryHub component for hub pages
Use existing NewsletterCTA component
Placeholder pages for all links to avoid 404s
No hardcoding — use spark.ts data file

BUSINESS TYPE TAGS on every hub:
[Applies to: All business types]
[Applies to: Service businesses primarily]
[Applies to: Digital/Remote businesses]
[Applies to: Local businesses]
[Applies to: Side hustle starters]

SIDE HUSTLE FLAG on relevant content:
[Side hustle path: included]
[Side hustle path: see alternatives]

Always include examples across all
business types where applicable.
```

ONE-LINE SUMMARY

```
text

Pillar 1 is the only place on the internet
that tells the complete honest truth
about starting a solo business —
emotionally, tactically, and practically —
for the majority of people doing it
alongside a job, with real fears,
and without a clear roadmap.
```

That is the complete architecture for Pillar 1: The Spark.
